

RELEASE NOTES

Firmware-Ver 3.90 [20th December, 2018]

[USB-DAC Local Player]

- Added more USB-DACs supporting MELCO Markerless DSD.
 - Brinkman Nyquist DAC
 - Cambridge Audio Edge NQ
 - iFi Pro iDSD
 - Marantz SA-12 / ND8006
 - Mytek digital Brooklyn plus / Liberty
 - Playback designs Dream DAC / Dream Transport / Melrot DAC

[Playback and Control]

- Improved stability of playback
- Improved OLED Title Display at change of track or increment in playlist in MODE0, Gapless playback.
- Improved OLED Title Display at end of playlist.
- Direct wired connection of iPad or Tablet to give control when in 'Direct Mode' without requirement for Router.
- "UP" button resets the playback when controlling by App.

[SMB sharing]

- Windows10 ver.1809 or later version cannot access to SMB sharing folder without ID/Password.
So, for those Windows10 user can access to Melco Music Library with ID:nobody / Password:nobody
- Improve file name and folder name indication

[Media Server]

- Updated to Twonky 8.5.1
- "Update Music Database" is changed title to "Clear and Rebuild Database".
Rebuild Database includes Expansion Drive. (Previously rebuild database was only internal HDD).

[USB-CD Drive connection]

- Improve OLED display when playing music from connected USB-CD drive.
- Changed message when data disk is imported
- Checking message shows up when CD is already imported

[Support function]

- Added menu to check connectivity of each internet connection service
- Added menu to check internal drive
- Added confirmation display before creating archive file

[Others]

- Added menu to remove Expansion drive, no need to power off to remove
- Improve process of handling internal drive during boot up
- Improve backup and import via USB ports function
