

N1EX / N10 / N100 – Music Library System Software

MELCO
SOUND INVESTMENT

RELEASE NOTES

Firmware–Ver 4.01 [16th December, 2019]

MELCO Music Library System Software Ver 4.01 for N1EX/N10/N100

[Changes from N10/N100 1.03]

- Supports N1 EX Series Hardware
- Home Screen for N1 EX
- 2-Drives RAID support
- Power LED Brightness/RJ45 LED Control
- Dedicated Expansion/Backup/USB-DAC ports

New Support features

- Web Remote → Control MELCO from any web browsers
- Internal Drive Check → Same capability as N1 3.91
- Media Server Selection → Twonky Server/Minim Server/Off are available
- Song Kong Installer/Controller

Minim Server is a popular UPnP/Open Home Media Server which supports various tags.

Song Kong for MELCO Lite is a tool to obtain various tags available online.

With them, you can utilize extended tags for rich browsing experience.

MELCO provides navigation tree indexes for Classical/Jazz/Rock and Pops.

Minim Server and Song Kong can be updated separately from MELCO System Update.

When Minim Server is available, Twonky Server is disabled and some features depend on Twonky Server also be disabled. (ex. Playback using buttons on N1/N10/N100)

Song Kong / Minim Server takes more time to startup than Twonky Server. You can use them after 2 minutes from boot up or enable.

After Minim Server/Song Kong are activated, new share folder named Log will be appeared for trouble investigation.

Please contact Song Kong and Minim Server directly if any questions.

Song Kong: <http://www.jthink.net/songkong/>
Minim Server: <https://minimserver.com/>

Media Server Off is useful for non-UPnP environment or non-server use.

New USB-DAC local player features

- Song Title/Artist Name for MELCO Localplay front panel playback
- Marker-less DSD support : Mark Levinson No5805/Ayre QB-9 twenty/PRIMARE i15
- vTuner internet radio browser can be used on MELCO Music HD app

New CD import features

- Song titles can be seen before importing
- Support Drive Tray Control with DOWN button

Improvements

- New Song Title Font supports Chinese and Korean Characters
- USB-DAC local player: over 2GB WAV file can be played again
- New Time zone Option for China Standard and Taipei
- Behavior of OTOTOY downloader
- More stability for various environment
- Notice when backup without date/time settings.
